

Scorpion Point Benefits

Time and Cost Savings

- Sequential testing of multiple units from a single location and automated fan assisted stimulus clearing deliver radical time savings
- Remote confirmation of alarm activation removes the need for 'man and mate'
- Out of hours working minimised or eliminated
- Physical access equipment costs eradicated
- Huge time savings from accessibility gains (even where physical access equipment was not required)

Accessibility

- Detectors in secure areas checked without physical access
- Detectors at height or in otherwise hazardous locations safely and quickly tested
- Detectors in tricky locations such as voids, behind cable trays or in lift shafts rendered accessible for testing
- Disruption to 24/7 processes or public areas eliminated

Approved Stimulus

- Benign consistent particulate dispensed under software control avoids material contamination through over or incorrect use

Compliance

- True functional testing using stimulus with wide smoke particle size range
- Access issues resolution eliminates maintenance variations, exceptions and deviations
- Elimination of access challenges avoids conflict with safety (access) rules

Traceability

- Test dates and times recorded alongside personnel
- Audit trail stored at device level (on site) and easily interrogated by future users
- Test data downloaded for use in back office systems and user reports
